PROFESSIONAL SUMMARY

Demand generation operator who builds the automation underneath the growth, not just the campaigns on top of it. Runs a self-hosted n8n instance and 100+ custom AI agent skills as daily marketing infrastructure, the same "agentic marketing team" operating model this role is built around. Has taken organic and AI-assistant visibility from near-zero to real ranked traffic, and owns the CRM and automation stack end to end rather than handing it to someone else. Work has contributed to \$10M+ in qualified pipeline across B2B SaaS and FinTech companies. More at jameppraise.xyz/work/c-teleport.

Selected Achievements:

- Built SEO and AI-assistant visibility for Hank Robotics from a single indexed page. **+267% Google Search clicks, 3,000+ keywords ranked in 90 days, +1,900% MQL growth**, for a seed-stage SaaS in a saturated category.
 - Runs a self-hosted **n8n instance and 100+ custom AI agent skills** as daily marketing infrastructure, 31 published publicly on GitHub, real proof of building and operating agentic marketing systems, not just using AI tools ad hoc.
 - Built **AI-driven SEO and content systems** at Reform that increased non-branded organic traffic **48%**, boosted domain rating 22%, and scaled publishing velocity 30-100x.
 - Designed a phased freemium-to-paid migration (90/30/7/1-day cadence) built in Brevo with **n8n-validated cohort segmentation**, moving 72% of legacy users to paid without backlash.
 - Built dashboards and attribution reporting from scratch (GA4, Looker Studio, HubSpot) at FunnelEnvy to stop single-channel overcounting across partnership and paid channels.
