PROFESSIONAL SUMMARY

Marketing and revenue systems operator who owns the technical implementation of GTM stacks. I've built and migrated marketing operations infrastructure end to end: email platform migrations with full data-hygiene work (authentication, list cleanup, deliverability), AI-enabled outbound and enrichment stacks, and agentic tooling that runs in production. My work has contributed to \$10M+ in qualified pipeline across B2B and SaaS companies. I use Claude Code every day to build my own marketing systems. More at <https://jameppraise.xyz/work/remote/>.

Selected Achievements:

- Led the Email Service Provider (ESP) migration from Userlist to Brevo at Reform, full authentication setup (DKIM/DMARC/SPF) and a Kickbox-driven list cleanup (10,104 to 7,808 contacts), cutting email churn by 22% and bounce rates by 18%, the same data quality and retention discipline applied to email infrastructure.
 - Built Reform's PartnerStack affiliate program from scratch (recruiting, incentive structure, tracking) and its broader partner distribution strategy.
 - Designed and implemented an AI-enabled outbound GTM stack at FunnelEnvy (Clay, Iemlist, LinkedIn Sales Navigator) and a separate ABM playbook (Clay, ExactBuyer, Instantly), lifting outbound reply rates 27% and enterprise meeting bookings 31%.
 - Built agentic growth infrastructure at FunnelEnvy, a centralized brand knowledge repo, custom Claude skills, and a Webflow MCP publishing pipeline, generating 10+ distribution outputs from a single content asset in production.
 - Built and led revenue operations across multiple business units at Cecure Intelligence Limited, unifying pipeline and reporting while launching a five-country Academy go-to-market program: 1,646 Marketing Qualified Leads (MQLs), 406 Sales Qualified Leads (SQLs), 629 demos booked.
