Binance – Paid Ads & Search Specialist (Africa)

The hardest part of this role, reaching local buyers in markets where crypto ads are restricted, is work I've been doing in Nigeria and across Africa for years. I'm Nigerian, I live in Lagos, and I started using Binance in 2021, so I know how people here ask about crypto and what worries them when they do.

Before applying, I ran 12 searches across six African markets in English, Swahili, French and Hausa. Where Binance has a current local page, the answer uses it. Binance's own post answers whether it's legal in South Africa, and a Binance P2P page ranks first in Ghana for buying USDT with MTN Mobile Money. In Nigeria, Binance didn't own the answer to any of the five searches I ran. Google's AI answer to "is Binance still working in Nigeria" leans on Breet, a cash-out app, and the only Binance page it cites is the March 2024 announcement. I wrote it up with a 90-day plan at jamespraise.xyz/work/binance/proof.

On paid, I launched CIL's academy across Nigeria, Ghana, Kenya, Rwanda and Angola at a customer acquisition cost below $0.50, with 2 to 3x return on ad spend on monthly budgets up to $15K. I've also run Meta and TikTok ads for a Nigerian leather goods brand for more than five years at about 8x return on ad spend. On search, I ranked Distrobird for 3,000+ keywords in 90 days, and on a Nigerian content site I run, I pull Search Console and URL Inspection data through Google's APIs on a schedule. I read results against the backend too. On my own course launch, that's how I found the checkout page was where buyers dropped off.

I've built tracking from the tag level up with Google Tag Manager, Google Analytics 4, server-side tagging and Meta's Conversions API. On a Nigerian webinar funnel, that setup showed 193 registrations at ₦193 per lead, and I report on it in Looker Studio.

Paxful's former users in Nigeria, Ghana, Kenya and Cameroon are still choosing where to trade, and many of them will ask Google or an AI assistant first. I'd like to help make sure Binance is the answer they find.

James

P.S. I've created a portfolio focused on this role at jamespraise.xyz/work/binance.
