PROFESSIONAL SUMMARY

Go-to-market operator who builds the pipeline system and runs it hands-on: ideal customer profile, messaging, outbound, inbound, partner pipeline and revenue reporting. At Cecure Intelligence I led demand generation for a cloud solutions and technical training provider selling with AWS, Google and Microsoft, and generated 1,646 marketing qualified leads, 406 sales qualified leads, 629 demos and $3.4M in open deal value. At FunnelEnvy I ran outbound and account-based marketing for B2B clients, averaging $151,962 in pipeline created per client per month at 11.6x return on total spend. I build the systems with AI tools and published 34 of my 81 agent skills on GitHub. I judge results on actual sales, not platform dashboards, and I work remotely with founders and technical teams.
