Professional Summary

Growth and demand generation operator with 7+ years of hands-on experience working with early-to-growth stage companies across Africa, North America, and Europe. I own paid acquisition end to end, from campaign architecture and budget pacing through creative iteration and measurement, and I build the affiliate and partnership relationships that compound alongside it. My work has contributed to over \$10M in qualified pipeline and 4,000+ MQLs across B2B, SaaS, and product-led companies. I run every workflow AI-natively: I've built 123 custom AI agent skills for my own daily marketing operations, 31 of them published publicly, and I built my own end-to-end paid-acquisition measurement system for my own bootstrapped business rather than trusting a single ad platform's dashboard. More at jameppraise.xyz/work/todoist.

Selected Achievements:

- Personally activated and ran Google Ads and LinkedIn Ads at Hank Robotics as part of a 9-week, ground-up go-to-market (GTM) build, delivering +1,900% MQL growth and +267% search click growth from near-zero presence.
- Ran paid acquisition at 2-3x return on ad spend (ROAS) on \$1.5K-\$15K monthly budgets with customer acquisition cost (CAC) under \$0.50 at Cecure Intelligence Limited (CIL), while securing partnerships with AWS, Google, and Microsoft that anchored a 5-country product launch.
- Built partnership relationships that contributed 14% of new qualified pipeline at FunnelEnvy and 11% at Reform, in both cases without a dedicated affiliate program already in place, sourced from targeted, high-fit partner relationships instead.
- Built a self-hosted, end-to-end paid-acquisition measurement system (Google Tag Manager, first-party server-side tracking, Meta pixel and Conversions API, GA4) for my own bootstrapped business, catching a real cross-attribution error in Meta's own reporting and isolating a checkout-stage leak the ad platform's dashboard alone never surfaced.
- Built and use 123 custom AI agent skills across my daily marketing operations (positioning, paid, SEO, GTM engineering), with 31 published publicly on GitHub for other operators to install and use.
