PROFESSIONAL SUMMARY

GTM Engineer who owns revenue-operations infrastructure end to end: lead routing and tiering logic, email deliverability engineering (SPF/DKIM/DMARC, domain warming, sender reputation), CRM and marketing-automation integration, and the n8n/API automation connecting them. I've led a full email service provider migration with complete deliverability setup, built send-tiering rules validated against real enrichment accuracy data, and connected CRM, ESP, and outbound systems through custom Python pipelines and n8n workflows. My work has contributed to \$10M+ in qualified pipeline built on infrastructure I designed and maintain myself. More at <https://jameppraise.xyz/work/mntn/>.

Selected Achievements:

- Led the **ESP migration from Userlist to Brevo** at Reform: full deliverability setup (DKIM, DMARC, SPF), list cleanup via Kickbox, and n8n workflow validation, direct, hands-on ownership of the exact deliverability discipline (domain warming, sender reputation, technical setup and health monitoring) revenue-operations teams depend on.
- Built and ran a **lead-routing and tiering system** at MIA GTM: a tiered send-list rule built only after a real accuracy analysis of enrichment sources (database enrichment vs. website-scraped emails), so routing decisions follow evidence, not a rule of thumb.
- Built and run a **free-first prospect data engine** at production scale: 40+ reusable Python modules across 10+ source adapters, feeding a common schema, dedupe, enrichment, and signal-scoring pipeline. One live run: 409 companies sourced, 271 verified emails enriched, 405 leads generated.
- **Extended the same engine to two more source types** to prove the architecture is genuinely source-agnostic: a GitHub Search API and Hacker News adapter (784 qualifying repositories scraped into a 69-lead send-ready list) and a WordPress Plugin Directory, Google Play, and Apple App Store adapter set (437 leads built and quality-assured across three sources).
- Built **cross-tool measurement systems** at FunnelEnvy connecting HubSpot, GA4, and Looker for funnel visibility, direct experience reporting on system health inside a Salesforce/HubSpot-adjacent stack.
- Built an **AI-enabled outbound GTM stack** at FunnelEnvy using Clay, n8n, Claude Code, and Smartlead, improving outbound reply rates by 27% and lifting enterprise meeting bookings by 31%.
- Led revenue operations at Cecure Intelligence Limited, generating 1,646 MQLs, 406 SQLs, and 629 demos, with \$326K in sales velocity.
