PyTorch Foundation – Senior Director of Community

Dear PyTorch Foundation team,

A recurring pattern in my career is being trusted to take an ambiguous community problem and turn it into a structured system. At Cecure Intelligence, a cloud and technical training company working with AWS, Google and Microsoft, I built a community of 20,000+ members and onboarded 10,000+ users to its academy in Nigeria, Ghana, Kenya, Rwanda and Angola, at under $0.50 per customer.

The ambassador side of your plan is work I do now. I'm a Claude Community Ambassador for Anthropic, where I lead local activity through events and workshops, and I mentor marketers at ADMARP. In Lagos I co-host Marketing & Chill twice a year for 60 to 80 marketers, and I run a WhatsApp community around my newsletter, which has 5,000+ subscribers across 86 countries and a 47.5% average open rate. Matt White wrote that the Ambassadors program "scales something no single team can manufacture: local leadership." Giving those local leaders a kit, a calendar and answers is the part of the job I would start with.

I build with AI tools every day. I use 81 agent skills for my own work and publish 34 of them at github.com/realjaymes/marketingagentskills, with a beginner guide so other people can install them. At Bujeti, events and partnerships produced more than 200 of our 1,331 marketing qualified leads in six months.

I also counted the people who commit to more than one of PyTorch, vLLM, DeepSpeed and Ray over the past year, from public GitHub data. Of 4,263 contributors, 182 work across projects, and 125 of those sit between PyTorch and vLLM, so Ray and DeepSpeed have the most bridging left to do.

I'm based in Lagos and open to working as a contractor. Four project communities now sit under one roof, and Mark Collier's post on joining as Executive Director promises each one that it belongs there. I'd like to talk about where the Ambassadors program is today and which of the four communities needs a person first.

James

P.S. I've created a portfolio focused on this role at jamespraise.xyz/work/pytorch-foundation.
