Product Marketing | Solution Marketing | Go-to-Market Strategy

Summary

Product marketing operator who translates complex enterprise platforms into narratives that land with C-suite buyers, not just technical evaluators. Builds the positioning, competitive intelligence, and field enablement systems that keep a platform story consistent as a company scales past its first major category pivot. Founder of Marketing In Action (MIA) and co-founder of Titaja, a product marketing-as-a-service agency serving product-led B2B companies. More at jamespraise.xyz/work/camunda.

Selected Achievements:

- Built and ran a continuous competitive intelligence program at FunnelEnvy: battlecards, win-loss analysis, and competitive position updates briefed to the sales team on a defined cadence, not a one-time project.
- Repositioned Reform from a general-purpose form builder into a category-specific conversion tool for a defined technical buyer, translating a complex platform into language a non-technical buyer could act on: 34% lift in trial activation.
- Progressed from an individual-contributor sales role to Chief Revenue Officer within 12 months at Cecure Intelligence, building the account-based pipeline system that generated \$1.6M in qualified pipeline along the way.
- Direct specialists on client engagements at Marketing In Action while remaining the person who writes the positioning and briefs the team myself, the same player and coach balance this role names.
- Run daily on Claude Code and n8n, and have built and shipped 123 AI agent skills (31 published on GitHub), the AI-fluency this role expects at a senior level.

Experience

Marketing In Action (MIA) / Titaja

Founder (MIA) and Co-founder (Titaja) | 2022 – Present | Remote

- Direct specialists on client engagements while remaining the person who writes the positioning and briefs the team, real proof of building a narrative system that doesn't depend on doing every task myself
- Built two B2B marketing organizations from zero: MIA (an execution-first marketing ecosystem for founders and marketers, 5,000+ newsletter subscribers, 47% average open rate) and Titaja (a PMaaS agency delivering GTM strategy, positioning, and launch systems for product-led companies)

- Executed product positioning, messaging frameworks, and competitive analysis for Titaja client engagements
- Drove 10+ product launches across digital products, services, and lifecycle campaigns
- Built sales enablement materials, pitch decks, and competitive briefs for agency client engagements

FunnelEnvy

Product Marketing and Demand Generation | 2021 – 2022 | Remote

- Owned the competitive intelligence program: battlecards, win-loss analysis, and competitive position updates briefed to the sales team on a defined cadence
- Owned product positioning and messaging for an enterprise conversion optimization platform
- Built and ran ABM campaigns targeting enterprise financial services, e-commerce, and SaaS accounts; contributed to \$1.6M in pipeline in a 9-month period
- Established a partnership program that generated 14% of qualified pipeline from embedded distribution partners
- Ran demand generation across paid, content, and event channels with attribution tracked through Salesforce

Reform

Product Marketing | 2021 – 2022 | Remote

- Built the PMM foundation from scratch for a developer-first B2B SaaS form/survey platform (10,000+ business customers), including the positioning and messaging framework
- Repositioned the product from general-purpose to category-specific for a defined technical buyer: 34% lift in trial activation
- Produced competitive positioning against Typeform, Tally, and SurveyMonkey for sales use
- Built the integration partnership program; sourced and launched the Zuko integration that generated 11% of qualified pipeline

Cecure Intelligence (CIL)

Sales Manager → Partnerships Manager → Head of Growth and Marketing → CRO | 2019 – 2021 | Lagos

- Progressed from Sales Manager to Chief Revenue Officer within 12 months at a B2B cybersecurity SaaS company serving enterprise, government, and financial services clients
- Built the demand generation and account-based pipeline program from zero; generated \$1.6M in qualified pipeline over 9 months as Head of Growth
- Led GTM for cybersecurity SaaS products across enterprise segments and public sector
- Managed partnerships with technology vendors and channel partners
