

Arcessio – Founding Growth Marketing Lead

I'm applying because Arcessio needs someone who has built a marketing function from zero with AI doing the work of a larger team, and I've done that several times. At Bujeti (YC W23), I built the inbound engine the company didn't have and generated 1,331 marketing qualified leads in six months. At Distrobird, I built a content operation from nothing that ranked for 3,000+ keywords within 90 days. At Reform, the AI-assisted search engine optimization (SEO) engine I built scaled content output 100x and lifted non-branded organic traffic 48%, and at FunnelEnvy I built the agentic infrastructure that turns one content asset into 10+ channel outputs.

Arcessio has to win engineers through the product while giving enterprise and defense buyers a different kind of proof. Before applying, I built a small workflow that checks who AI answers cite when engineers ask about quoting and manufacturing, and Arcessio didn't appear in any of the 12 answers. That gap is where I'd start.

I don't have manufacturing or computer-aided design experience. The closest I have is Hank Robotics, a pre-commercial robotics company where I built positioning and SEO from scratch and grew organic sessions 2,064% in nine weeks.

I work from Lagos and hold a valid passport. I'll apply for a US business visa for the team meetings, customer visits and events this role expects.

James

P.S. I've created a portfolio focused on this role, including the full audit, at <https://jamespraise.xyz/work/arcessio/>.
