PROFESSIONAL SUMMARY

AI-native go-to-market builder who has built marketing functions from zero more than once, as a founder and as an early operator at product-led and technical companies. I build the systems I run on: 72 AI agent skills in daily use on Claude Code, self-built outbound and enrichment pipelines, self-hosted n8n automations, and a public GitHub repository other operators install and use. Work has contributed to \$10M+ in qualified pipeline and 15+ product launches across B2B SaaS, fintech, robotics, and AI infrastructure companies in Africa, North America, and Europe. More at <https://jameppraise.xyz/work/arcessio/>.

Selected Achievements:

- Built and run **72 AI agent skills** (Claude Code) as my own daily marketing operating system, **31 published publicly** on GitHub. The direct proof that I build AI-native marketing infrastructure rather than just use AI tools.
 - Built **MIA GTM**, a self-built go-to-market system (positioning, prospect data engine, outbound) marketed to tech startups, B2B agencies and technical buyers across five distinct niches, a real precedent for building a product-led-growth-plus-enterprise motion from zero, alone.
 - Built **positioning, messaging, and ICP playbooks from scratch** for Hank Robotics, a B2B AI-powered drone and robotics company. **+1,900% MQL growth** in 3 months, full SEO content architecture across service, industry, persona, and case-study pages.
 - Shipped **agentic content distribution infrastructure** at FunnelEnvy: 10+ multi-channel outputs from one content asset, running on Claude Code, MCP, and n8n.
 - Grew **Marketing In Action**, my own newsletter and marketing ecosystem, to **5,000+ subscribers at a 47% average open rate**, original thought leadership published weekly, not AI-generated volume.
