Professional Summary

Content and growth operator who builds the AI-native systems content runs on. I've built inbound content engines from zero at technically credible B2B SaaS companies (Distrobird: 3,000+ keywords ranked, 500K monthly search impressions in 90 days), scaled AI-assisted content production 100x (Reform), and run my own publication, the MIA Newsletter, on a self-built four-phase AI content workflow that reaches 5,000+ subscribers at a 47% average open rate. Hands-on with Ahrefs, Semrush, the DataForSEO API and WordPress plugin setup. More at <https://jameppraise.xyz/work/onthegosystems/>.

Selected Achievements:

- Built an inbound content and SEO engine from zero at Distrobird (B2B SaaS, sales engagement), managing a 5-writer, 2-editor team to rank for 3,000+ competitive keywords and reach 500K monthly search impressions within 90 days, in a saturated CRM/sales-engagement category.
- Built Reform's AI-assisted SEO content engine, scaling output 100x and lifting non-branded organic traffic 48%, including technical comparison pages that drove a 19% increase in decision-stage leads.
- Built and run the MIA Newsletter's entire AI-native production stack (4-phase content workflow with review gates, a Copy Engine and Design Engine, automated multi-channel distribution) reaching 5,000+ subscribers at a 47% average open rate.
- Built 72 AI marketing skills used daily in a 120-skill Claude Code operating system, 31 published publicly on GitHub, real, shipped AI-agent infrastructure, not a description of occasional AI use.

Key Skills

Content & SEO: Content Strategy & Production, Organic Search (SEO), Technical/Comparison Content, Email Lifecycle Content, Newsletter Publishing, Case Studies & Sales Copy

AI-Native Systems: AI Agent & Workflow Design (Claude Code), Automated Multi-Channel Content Distribution, AI-Assisted SEO Content Engines, n8n Automation

Marketing Operations: Product Marketing, Conversion Optimization, Team & Specialist Management, Cross-Functional Collaboration (Product, Engineering, Support), Data-Driven Measurement (GA4, Search Console)

Platform Familiarity: Direct WordPress admin/content-structure experience (FunnelEnvy migration project); primary site-building experience is hand-coded static HTML/CSS/JS, not WordPress-native
