PROFESSIONAL SUMMARY

GTM Engineer with 5 years of experience building and running outbound systems for B2B and SaaS companies, from Clay tables and Python scrapers through AI personalization, outbound copy and deliverability. I write the prompts and the copy myself, review every rendered email before it sends, and change the system based on what the campaign data shows. My work has contributed to \$10M+ in qualified pipeline. More at jameppraise.xyz/work/buyersight.

Selected Achievements:

- Built an **AI-enabled outbound GTM stack** at FunnelEnvy on Clay, Instantly, Lemlist, ExactBuyer and Sales Navigator, improving outbound reply rates by 27% and lifting enterprise meeting bookings by 31%.
- Built and ran an **end-to-end AI cold outbound engine** for my own agency: Google Maps scraping, Python classification, enrichment and verification, AI-written per-contact personalization, a self-built HTML preview tool to QA every email, and Smartlead sending across 9 warmed mailboxes on 3 domains.
- Ran a **home care outbound campaign** on that engine from 1,796 scraped businesses to 1,116 emails sent, a 3.36% reply rate and a 1.25% bounce rate.
- Built a free-first **prospect data engine** (40+ Python modules across 10+ sources), live at production scale: 409 companies sourced, 271 verified emails enriched, 267 send-ready after tiering.
- Ran an **enrichment source analysis** in MillionVerifier (database emails 71% good and 2% bad against website-scraped emails at 53% and 10%) and rebuilt the send tiers around it.
- Led revenue operations at Cecure Intelligence Limited, generating 1,646 MQLs, 406 SQLs and 629 demos booked, with \$326K in sales velocity.
